

PRODUCTS AND SERVICES

RELIABILITY AND SAFETY

The flexibility of the company ensures that it can operate in many different sectors: from plant to oleodynamics (burners, conditioners, pumps), from compressed air to components and even the machinery sector (compressors, epicyclical reducers and planetary gears, supports, axles for heavy duty vehicles, braking systems). Different kinds of material can be processed: steel, cast iron, aluminium, brass, etc., which (in bars or castings/forgings) are delivered by qualified suppliers.

ASSEMBLING

INDUSTRIALTECHNICS is in a position to supply with assembled parts. Here below there are some examples.

Gear systems (epicycloidal reduction gears and planetary gears)

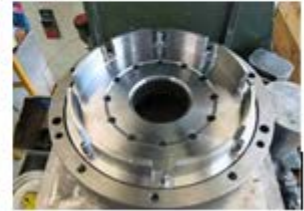

Axles for vehicles

Actuators

Brake systems (brakes, multiple disc brakes)

Parts for compressors

CUSTOMIZED SERVICES

Our experience, know-how and continual improvement enable us to offer efficient and extremely competitive integrated services which are modular and adaptable to your actual needs.

Industrialtechnics makes available today:

- Logistics services such as warehousing and inventory management with Just in Time, Kanban and consignment stock
- Heat and/or galvanic treatment services
- Processes and treatments for cast iron products, non-ferrous metal castings and bars, forged and bar steel
- Supply services for all product components required
- Any other service on request and in partnership with specialized external suppliers

Industrialtechnics is constantly active in the search for new solutions and services aimed at customer satisfaction and the constant improvement of internal and management processes.
