

TECHNICAL DATASHEET

FULL-FACE SHIELD REF. PLM2813/2814 BY PLANIMOLDE

Characteristics:

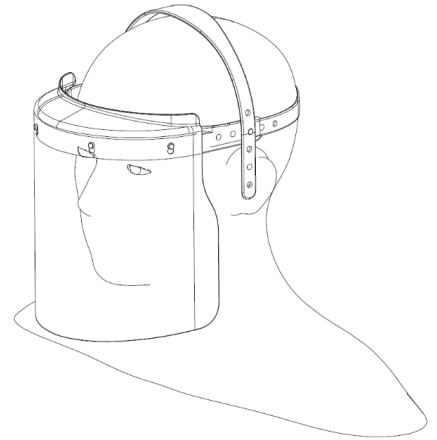

The Full-Face Shield is composed by a shield in polycarbonate, holder in propylene and adjustable straps in rubber.

The polycarbonate allows the shield a good visibility, lightweight, solidity and shattering resistance.

The holder and the adjustable straps allow the shield to be comfortable for ongoing use and a good resistance to fogging.

The shield allows you not only to wear your personal glasses as well as the safety goggles ref. PLM2817.

The full-face shield ref. PLM2813/2814 protects the full face from solid and liquid particles projection and presents no risk when in contact with skin.

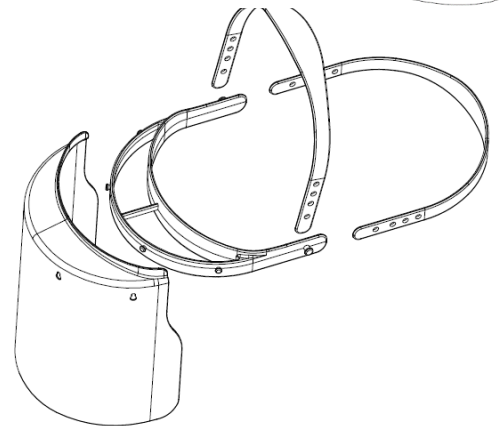

Materials Utilizados

Shield: PC (Polycarbonate)

Holder: PP (Propylene)

Adjustable Strap: TPE (Rubber)

This product has been determined as Category I, acc. to Annex I to the EU Regulation 2016/425, relating to the shield engraving 3-1.2 PLANIMOLDE and EN166 3 engraving on the Holder. The shield is not indicated for respiratory protection from biological agents.

Cleansing and Disinfection:

The shield may be cleansed with an alcoholic and chloride solution, with the help of a paper tissue or a smooth cloth. Disinfection may as well be made by immersing the shield in this same solution.

Dimensions: 189 X 260 X 299

Weight: 175Gr

Conformity evaluation:

After testing carried out acc. to EN166: 2001 (paragraphs 6,1; 6,2; 6,3; 7.1.1; ; 7.2.4; 8,1; 8,2; 8,3; 9 and 10) and to EN168: 2001, it was concluded that the product is compliant with the EU Regulation 2016/425.

Lifetime:

The full-face shield lifetime expires once it presents scratches or deformations on the shield itself.

Packaging:

Shield supplied in a plastic bag with technical datasheet and assembly instructions.

EU Declaration of Conformity can be found on our website.
